Concrete pavers are strong, durable, easy to install, and provide a value added option on any project.

**Accessibility**

Concrete pavers comply with ADA requirements for slip resistance, surface level and vibration levels.

**Bond Patterns**

A wide variety of bond patterns is possible. This is just a small sample of possible bond patterns.

(Note: All quantities based on a 10 x 10 sq. ft. area.)

**Drainage**

Slope surface a minimum of 1/4" per foot (2% slope) for adequate water run-off and drainage.

**Geotextile**

Prevents aggregates from mixing or migrating into base. Recommended for soft clay base materials.

**Cutting Pavers**

Wet saw is recommended; splitters are okay for smaller jobs.

**Estimating Materials**

**Sub Base Aggregate**

3/4” crusher run. For every 100 sq. ft. of area figure 2 tons material for 4” thick base.

**Setting Sand / Bed Sand**

For every 125 sq. ft. of area figure 1 ton of sand for jointing and 1” thick setting bed.
