How-To Assemble Your

GATHERING GRILL

PART NO. FPS-200
DIFFICULTY BEGINNER
APPROX. DIM. 3'3"W x 2'8"D x 1'7"H
APPROX. WEIGHT 1,600 lbs.

GENERAL SHALE OUTDOOR LIVING PRODUCT WARRANTY
All General Shale Outdoor Living products are warranted to be made from high quality materials that meet or exceed ASTM material standards. Outdoor Living products are intended for recreational or residential use and are not warranted for any other purpose. The life of the product depends on correctness of installation and extent of usage. All metal components are subject to normal rust and corrosion.

ANY IMPLIED WARRANTIES ARE HEREBY DISCLAIMED AND ARE EXPRESSLY EXCLUDED.
**Materials included** with your outdoor kit.

- (37) Weathered Block “A” (4" x 8" x 16")
- (10) Weathered Single Bullnose Block “C1” (4" x 8" x 8")
- (4) Weathered Bullnose Corner Block “C2” (4" x 8" x 8")
- (4) Weathered Bullnose Block “C3” (4" x 3 5/8" x 8")
- (1) Grate Insert (not pictured below)
- (1) Ash Pan (not pictured below)
- (1) Thin Set Mix Bag (not pictured below)

**Additional materials required** to install your kit.

- Concrete or Gravel (for setting base)
- Level
- Mixing Bucket
- Note: You may also use landscape adhesive (available separately) in place of supplied thin set mix.

**NOTE:** This unit is designed for outdoor use only. This unit is not designed to be used on wood decks or under roof enclosures. Locate unit reasonable distance from any combustible materials. Comply with local building code(s) and burning permits as applicable. Retain these instructions with unit.
Step 1

Create a level base using Crusher Run Stone to accommodate the overall footprint of the grill.

- Prepare an area 3'9" wide x 3'2" deep.
- Remove sod and vegetation.
- Excavate/remove soft soil as required to provide level stone surface at a minimum of 4" deep.
- If required, use landscape blocks to retain stone base.
- If installing optional hearth/knee wall, extend base as required.

⚠️ If soil under sod is hard, soil can be leveled out and used as a base material.

Reference diagrams for creating a level base.

NOTE: All outdoor living kits can be installed directly on a properly prepared stone base. However, for best performance and appearance, a concrete pad is recommended.
Begin building the grill (courses 1 though 4).

- Use supplied thin set between each course; apply to the middle of the block to avoid squeezing it out from between courses.

**TIP** After laying the first course, check to make sure it is level before proceeding.

**Course 1 and 3**

(10) Weathered Block “A” (4" x 8" x 16")

**Course 2**

(10) Weathered Block “A” (4" x 8" x 16")

**Course 4**

(7) Weathered Block “A” (4" x 8" x 16")
Step 3

Continue building the grill (course 5).

- Use supplied thin set between each course.
- Apply a small amount of thin set in the vertical joints of course 5.

**Course 5**

(10) Weathered Single Bullnose Block “C1” (4” x 8” x 8”)
(4) Weathered Bullnose Corner Block “C2” (4” x 8” x 8”)
(4) Weathered Bullnose Block “C3” (4” x 3 5/8” x 8”)
Step 4 Install metal grate.

- Simply slide metal grate into the opening of course 5.

Step 5 Install ash pan.

- Simply slide/place the metal ash pan into the opening of course 4.

NOTE: Before using your Gathering Grill, wash the metal cooking grate with warm water and dish detergent. Season the cooking grate by applying several thin coats of oil. This will protect the metal from getting rusted and makes for a non-stick cooking surface. Season the surface by applying a thin coat of neutral good grade oil (vegetable oil, canola oil, sunflower oil, shortening or lard). Repeat this process after the first time and after the grate has allowed to cool.
