Elegant, energy-efficient and low maintenance, the Historic District Collection takes the best aesthetic attributes of used brick and improves upon them with modern production methods that meet the American Society for Testing and Materials (ASTM) standards, verifying durability and reliability.

Undeniably beautiful in appearance, used brick just doesn't stack up when you factor in the hassle of tracking down an available stockpile and necessary quantity of desired color, and the lack of a warranty.

PLEASE NOTE: This literature is intended to generally show the color range of the featured product. Using print and photography, it is impossible to show all colors, percentages of colors, texture and the harmless imperfections that may be contained in thousands of brick. Brick from different production runs may vary slightly in color range and texture.
