

Midtown 3-5/8" Biscayne

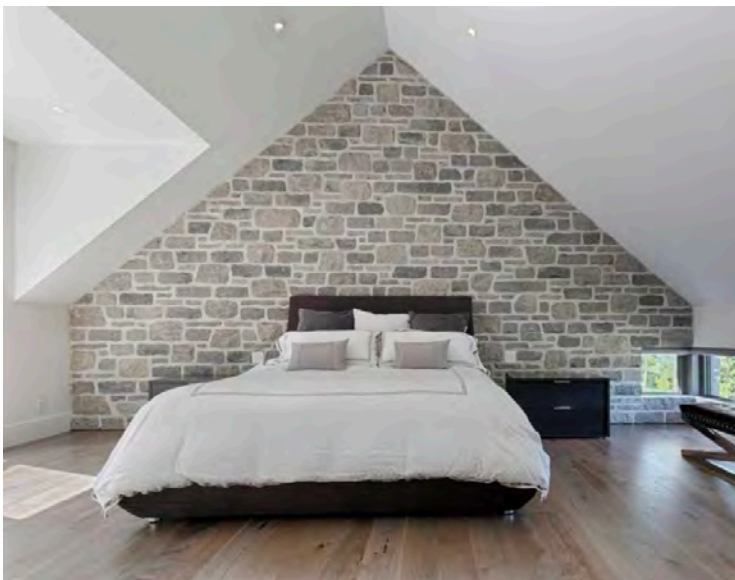

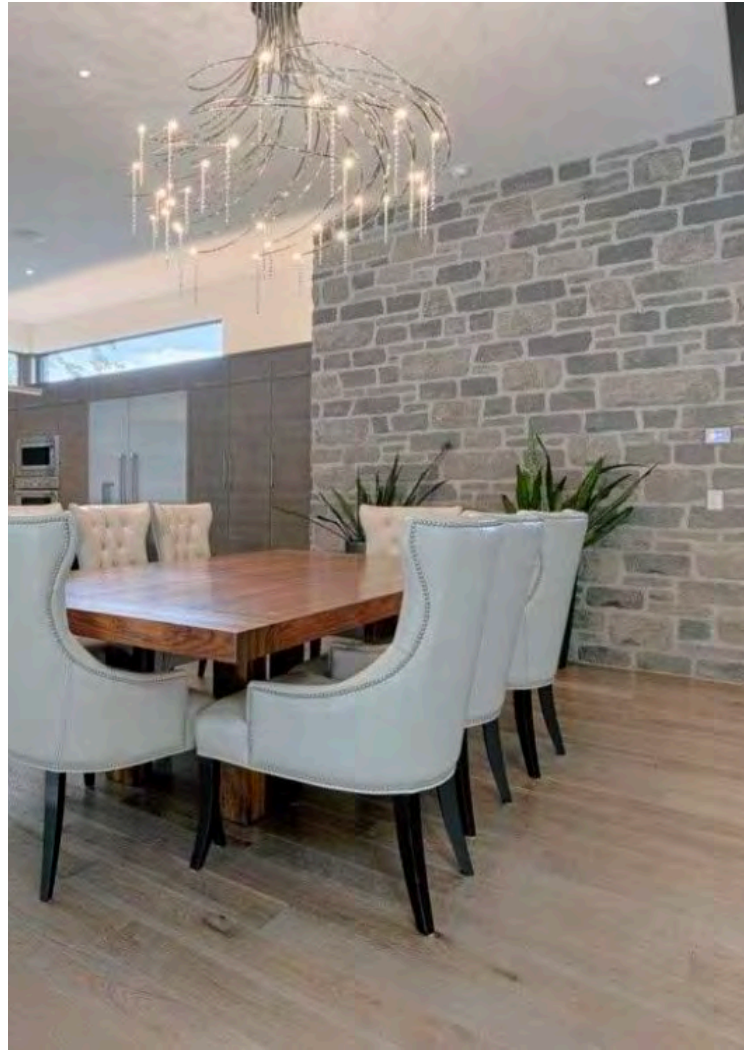

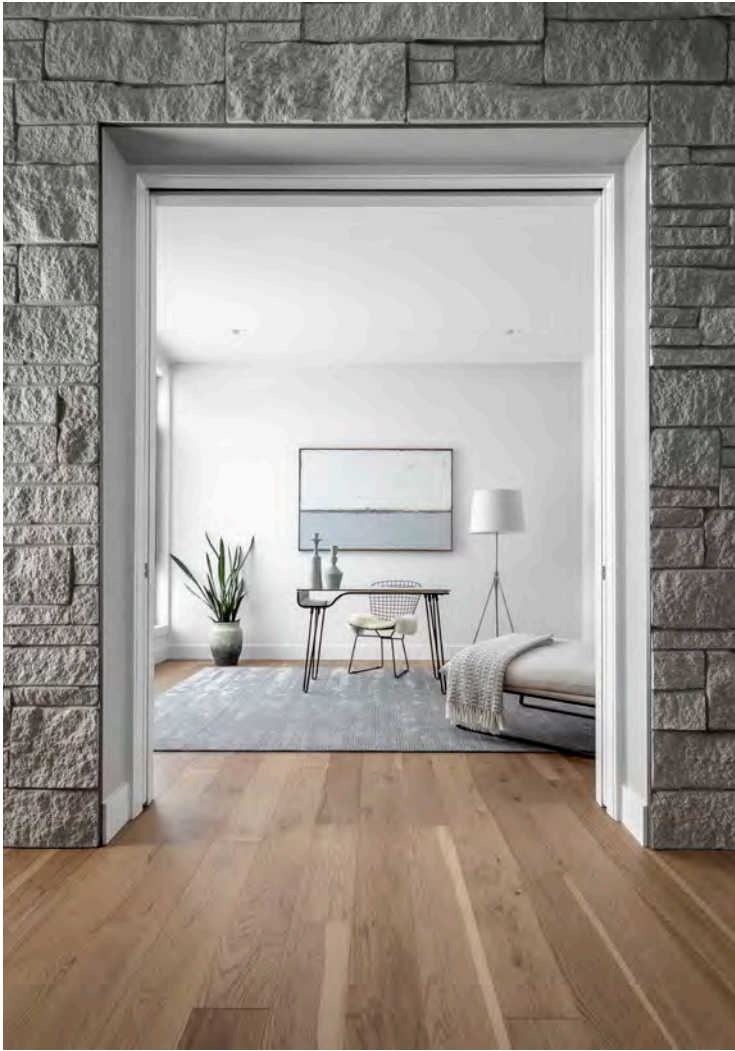

DISCOVER THE ARRISCRAFT THIN STONE COLLECTION

Our extensive thin products selection lets you incorporate stone on virtually any interior or exterior project. Lightweight and low maintenance, our thin stone options deliver the aesthetic of full bed stone, yet offer the ease of thin stone installation. And, like all Arriscraft stone, our thin products deliver superior natural aesthetics and durability compared to other thin stone. We offer adhered stone in diverse styles, finishes and colours!

BUT ISN'T STONE FOR THE EXTERIOR?

Don't get us wrong, we love to see our stone on all exteriors! But we've been developing our thin products line to offer our traditionally exterior stone products in thinner, lighter versions that are perfect for use indoors. The entire Arriscraft collection is now available in thin, so from fireplaces to feature walls, you'll find the perfect stone to complement your design.

WHY USE THIN MASONRY INDOORS?

- Stone is beautiful! It adds warmth, drama, style and personality.
- Bring the outside in with our thin adhered veneers. Consider continuing the motif of an Arriscraft exterior stone cladding on the interior walls.
- VOC-free ensuring safe and healthy indoor air quality for the benefit of building occupants.
- No need to load the interior building structure with 4" masonry when the same look and feel can be created with thin.
- CSMU stone doesn't burn or create smoke in a fire, aiding in life safety aspects in the event of a fire.
- Thinner stone materials mean more interior space.

THE COLLECTION

With 17+ styles and over 100 colours to choose from, you're truly spoiled for choice. As a starter, here are a few of our favourites:

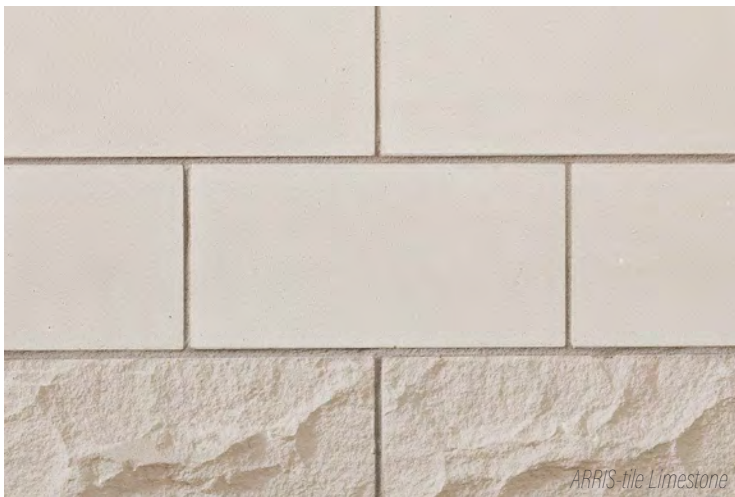

STACK

A ledge style stone, Stack features an authentic, split face finish or a contemporary sawn finish. Three face rises in random lengths are conveniently pre-blended to create the ashlar configuration.

MIDTOWN

Midtown is reminiscent of rustic, linear brick, with a choice of a natural, split face finish, or a contemporary smooth finish. The three sizes of Midtown (2-1/8", 3-5/8", 5-7/8") can be used individually or combined to achieve unique configurations.

ARRIS-TILE

The simple lines of ARRIS-tile have become a favorite for classic interior designs and for exterior applications in new and renovation applications all over North America. ARRIS-tile is available in smooth or rocked finish.

THIN-CUT BUILDING STONE

You know our Building Stone products - from classic Citadel® to contemporary Shadow Stone® - come in a broad array of natural colours, profiles and finishes. Our Building Stone is now available in a thin adhered format, so you can take that look everywhere.
